Objective

Recently I completed my military service and graduated Computer Science from Mansoura University with a strong foundation in web development and a passion for back-end technologies. Seeking a challenging role where I can leverage my comprehensive understanding of PHP, Object-Oriented Programming (OOP), Laravel framework, REST APIs, Blade templating engine, MySQL database management, and SOLID principles. Eager to contribute my skills in developing robust, scalable web applications while continuously expanding my expertise in web development technologies.

Education

Bachelor in Specific education (Very Good with Honors)

- Department of Computer Science, Faculty of Specific education, Mansoura University, Mansoura, Egypt
- Graduation Date: July 2022
- Degree: Very good with honors

Relevant Courses

PHP Laravel Backend Development

- Institution: EraaSoft
- Duration: February 2024- June 2024
- Description:
 - Studied PHP programming language, Object-Oriented Programming (OOP) concepts, and advanced techniques in the Laravel framework.
 - Acquired proficiency in designing and implementing RESTful APIs for web applications.
 - Developed expertise in using Blade templating engine for efficient frontend development.
 - Gained hands-on experience in MySQL database management and optimization.
 - Implemented SOLID principles to ensure robust, maintainable, and scalable code architecture.

Projects

Crud system

- Description:

This project is a blog management system built using the Laravel framework, designed to provide a seamless and efficient platform for creating, managing, and publishing blog posts. Leveraging Laravel Breeze for authentication and starter templates, the application ensures quick setup and secure user management. The backend is powered by MySQL, these technologies create a powerful and dynamic platform for bloggers to easily manage their content and engage with their audience.

- Technologies Used: Bootstrap, PHP, Laravel, breeze
- GitHub repository link: <https://github.com/Ibarhim3zazy/Sensive.git>

website management system

- Description:

This project is a website management system built using the Laravel framework, designed to showcase company services and provide contact information to the admin. Leveraging Laravel Breeze for authentication and starter templates, the system guarantees a quick setup and secure user management. The backend is powered by MySQL. Additionally, the project includes a user-friendly dashboard, enabling efficient website management and content control, Featuring multi-language support.

- Technologies Used: Bootstrap, PHP, Laravel, breeze
- GitHub repository link: <https://github.com/Ibarhim3zazy/bizconsult-1.0.0.git>

Technical Skills

- Languages: HTML, CSS, JavaScript, PHP
- Frameworks: Laravel, Breeze
- APIs: REST APIs
- Tools: Git, Visual Studio Code
- Database: MySQL

Languages

- Arabic: Native Language
- English: CEFR B1 Level (Intermediate)
